Abstract of DE10159390

The opening hard-top roof has at least 2 roof sections (2,3), the rear roof section displaced relative to the automobile body between a closed position and a stowed position via a cinematic mechanism (6), having 2 main levers attached to the body at one end and coupled together via a coupling rod. One main lever is pivoted to the rear roof section, the other main lever coupled to the rear roof section via an adjustable coupling element.
